SULEMAN SADAT

Software Engineer | **Full-Stack Developer** | **Open to Relocation.**
Email: suleman.sadat01@gmail.com | LinkedIn | GitHub | Portfolio

Experience

Full Stack Developer - MobiMix Ltd | **Tech:** React, Python, JavaScript, PHP — Jan 2021 - Dec 2024

- Supported the end-to-end development process, from planning and coding to testing and deployment, allowing the team to complete projects **65% faster**. Focused on creating scalable solutions, maintaining high standards, and fostering a collaborative culture that maximized team performance.
- Collaborated in an Agile/Scrum environment to design, develop, and deploy scalable features, contributing to faster release cycles and improved team productivity.
- Mentored junior developers and contributed to a collaborative engineering culture focused on quality and efficiency.

Full-Stack Developer | Freelancer | **Tech:** React, Next.js, Laravel, Slack, Docker, n8n — Jun 2025 - Aug 2026

- Delivered 3+ full-stack projects for global clients, with 98% client satisfaction and 30% fewer bugs after launch by testing thoroughly while building.

Projects

Student Management System - National Oxford (Remote, UK) | Tech: React, CSS, PHP, MySQL, Figma | VISIT

- Developed a secure full-stack platform to manage TOEFL/IELTS results and digital diplomas for **500+ students**, reducing manual verification time by **95%**, including an admin dashboard for users, scores, and documents.

AZIZI JEWELLERY (Remote, UK) | Tech: Next.js, TypeScript, Laravel 13, postgreSQL, Tailwind CSS | VISIT

- Built and deployed a full-stack gold and jewellery platform with secure authentication, appointment booking, WhatsApp integration, dynamic content, and role-based admin management.

Social Media Video Downloader Bot | **Tech:** Node.js, PostgreSQL, Telegraf | VISIT

- Built a cross-platform Telegram media downloader bot that automated social media video downloads, reducing manual processing time by ~**90%** through instant link-based retrieval.

CRM Automation | **Tech:** n8n, Docker, Hugging Face, OpenAI API | VISIT

- Automated lead capture and scoring system, improving lead processing speed by 80% and enabling real-time sales notifications to drive faster conversions.

Upwork Accelerator - Chrome Extension | **Tech:** JavaScript | Install

- Built and launched a Chrome Extension that displays client Hire Rates directly on Upwork job cards, eliminating 1+ click per job and saving time when reviewing 30–100+ job listings.

Business Landing Page - Aria Construction (Remote, Canada) | VISIT

- Built a responsive, fast-loading business landing page with SEO optimization to showcase services and improve customer engagement.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, PHP, **Python**, Java, C++, C#, SQL.
Frontend: React.js, Next.js, React Native, Flutter, Tailwind CSS, HTML5/CSS3, Figma.
Backend & APIs: Laravel, Node.js, RESTful APIs, MySQL, Telegram API.
AI & Automation: OpenAI API (LLM Integration), Codex, Cursor AI, Claude Code, n8n, Prompt Engineering.
Infrastructure & Tools: Docker, Git/GitHub, CI/CD, WordPress, Shopify.
Methodologies: Agile/Scrum, Full-stack System Architecture.

Professional Summary

Full-Stack Developer with 4+ years of experience building scalable web applications for startups and global clients. Skilled in React, Next.js, Python, PHP/Laravel, and modern deployment workflows, with proven experience delivering products in remote, distributed teams. Capable of building & managing full-stack systems independently and supporting teams with technical solutions.

Education

B.S. in Computer Science - Software Engineering | Avicenna University — March 2022 - Dec 2025

Certifications

Phoenix Event (Startup Grind, 2026) | Python (Kaggle, 2024) | Apple Ads Certified (Apple, 2026) | Problem Solving (ICPC & HackerRank, 2023)
